Data analyst with 7+ years across FMCG, retail and experiential marketing, specialising in reporting automation. I build pipelines that collect data from SQL Server, APIs and messy Excel/CSV files, clean it with Python, and deliver scheduled reports through Outlook with zero manual work — turning reporting that took teams hours into outputs that send themselves every morning.

EXPERIENCE

Melvin Marsh International (Melvins Tea) — Sales & Data Automation Specialist

2024 – Present

- Built a Python automation ecosystem that streamlined ~85% of daily sales and supply-chain reporting previously done by hand.
- Scheduled pipelines (Windows Task Scheduler) pull from SQL Server, refresh Excel trackers and email reports via Outlook before start of business — daily, hands-off.
- Wrote SQL Server queries and views powering daily sales, stock and distributor reports; built Power BI dashboards for management.
- Added validation that catches messy headers, duplicates and missing data before they ever reach a report.
- Turned recurring ad-hoc management data requests into lightweight scripts — hours of manual pulls became on-demand outputs.

Faces Integrated Ltd — Data Analyst

Mar 2022 – 2024

- Analysed retail performance with SQL for a client operating in major modern-trade chains countrywide, covering 50+ SKUs.
- Built automated Excel distribution and volume trackers across multiple retail channels, with monthly visualisations for client presentations.
- Developed weekly and monthly merchandiser attendance reporting that improved field attendance by 20%.
- Processed merchandising-app field data into structured market and competition visibility reports; ran forecast analysis for planning.

Hue Experiential Marketing — Junior Analyst

Oct 2020 – Feb 2022

- Automated recurring sales-team reports, supporting a 15% improvement in overall sales performance.
- Built weekly and monthly coverage & sales reports for field teams that reduced absenteeism by 25%.
- Presented analysis to management for action, contributing to a 30% improvement in field-based services.

BTL Africa — Merchandising Manager

May 2018 – Aug 2020

- Produced sales reports and insights for client decision-making; trained field teams on merchandising KPIs (+35% KPI performance) and helped grow share of shelf by 10%.

SKILLS

Automation: Python (pandas) • scheduled pipelines (Task Scheduler) • Outlook report delivery • API data collection

Data & queries: SQL Server • PostgreSQL • MySQL • advanced Excel

Visualisation & analysis: Power BI • Tableau • R • forecasting & trend analysis

CERTIFICATION

Data Science Certification — Sankhyana Consultancy
